This press release may contain forward-looking information based on current information and expectations of the Company that involve a number of risk, uncertainties, and assumptions. Among the factors that could cause the actual results to differ materially are industry conditions, prices of crude oil and gas, the Company's ability to obtain and the timing of new project, and changes in competitive factor. Should one or more of these risk or uncertainties materialize, or should the underlying assumption prove incorrect, actual outcomes could vary materially from those indicated

Sinergi Pemerintah - PGN Amankan Ketahanan Gas Domestik, PGN Tambah Pasokan dari Penandatanganan Swap Gas Agreement

Jakarta – Atas dukungan dari pemerintah, PT Perusahaan Gas Negara Tbk (PGN) kembali mendapatkan tambahan pasokan untuk memenuhi kebutuhan gas bumi domestik. PGN menyepakati dua kesepakatan strategis yaitu Domestic Swap Agreement dan Gas Sales Agreement dengan West Natuna Group.

Dua perjanjian ini mengatur sejumlah volume gas yang sebelumnya dialirkan ke Singapura dari West Natuna Group, akan dialihkan dan dimanfaatkan PGN untuk memenuhi kebutuhan domestik. Direktur Utama PGN Arief S. Handoko mewakili PGN untuk menandatangani perjanjian tersebut bertepatan dalam ajang IPA Convex 2025, (21/5/2025).

Dukungan dari pemerintah terhadap pemenuhan gas bumi domestik terus berkesinambungan. Pasca penandatanganan gas swap agreement, PGN berarti akan mendapatkan pasokan gas baru dengan volume lebih 71,83 BBTUD yang telah diamankan melalui penandatanganan 6 kerja sama, kemarin.

Penandatanganan gas swap agreement ini juga menunjukkan semangat pelaksanaan arahan yang diberikan Presiden RI, Prabowo Subianto.

“Mari kita bekerja sama kolaborasi, pihak swasta dalam negeri, swasta luar negeri, BUMN, pemerintah dari semua tingkatan. Mari kita bekerja sama untuk mencapai tujuan yang harus dicapai. Kalau kita tergantung dari impor terus, sumber daya yang kita keluarkan sangat besar,” ujar Prabowo dalam sambutannya saat Signing Ceremony of New Production Sharing Contracts and Commercial Agreements di IPA Convex 2025, Rabu (21/5/2025).

Menurut Kepala SKK Migas Djoko Siswanto, pengalihan atau swap gas domestik dilakukan sekaligus, sebagai langkah nyata mengatasi tantangan potensi defisit pasokan di dalam negeri. Sejauh ini impor masih bisa dihindari, sehingga pemerintah menyiapkan mekanisme swap gas agreement dengan pemasok gas dari wilayah Natuna.

“PGN menyampaikan apresiasi kepada pemerintah atas dukungan yang secara holistic diberikan dalam pemenuhan kebutuhan gas domestik. Kami akan

memanfaatkan pasokan dengan optimal demi keberlanjutan layanan gas bumi dan ketahanan energi nasional,” ujar Arief.

PGN berharap, swap gas domestik dapat memperkuat upaya bersama untuk memastikan pasokan gas domestik semakin stabil dan efisien. Kebijakan ini membantu memenuhi kebutuhan energi di berbagai sektor, khususnya industri. Penggunaan sumber daya gas bumi domestik secara optimal, juga membantu mengurangi ketergantungan terhadap impor energi.

Government-PGN Synergy Secures Domestic Gas Resilience, PGN Secures Additional Supply through Gas Swap Agreement

Jakarta – With strong support from the Government of Indonesia, PT Perusahaan Gas Negara Tbk (PGN) has secured additional gas supply to meet the growing domestic demand. PGN signed two strategic agreements—the Domestic Swap Agreement and the Gas Sales Agreement—with the West Natuna Group.

Under the terms of these agreements, a portion of the gas previously allocated for export to Singapore by the West Natuna Group will be redirected and utilized by PGN for domestic needs. PGN President Director Arief S. Handoko signed the agreements during the Indonesian Petroleum Association Convention & Exhibition (IPA Convex) 2025 on May 21, 2025.

This milestone further underscores the government's ongoing commitment to strengthening domestic gas supply. Following the signing of the gas swap agreement, PGN has secured an additional gas volume of over 71.83 BBTUD through six agreements formalized during the event.

The signing also reflects the spirit of the directive delivered by the President of the Republic of Indonesia, Prabowo Subianto, during the Signing Ceremony of New Production Sharing Contracts and Commercial Agreements at IPA Convex 2025.

“Let us work together—domestic and international private sectors, SOEs, and all levels of government. Collaboration is key to achieving our national goals. Continued reliance on imports places a significant burden on our resources,” President Prabowo stated.

Head of SKK Migas, Djoko Siswanto, emphasized that the domestic gas swap mechanism is a tangible measure to mitigate the potential gas supply deficit. To date, import alternatives remain avoidable, as the government implements this mechanism using supply from the Natuna region.

“We sincerely appreciate the government's holistic support in ensuring domestic gas availability. PGN is committed to optimizing the newly secured supply to ensure continued service reliability and national energy security,” said Arief.

PRESS RELEASE

Date : May 21, 2025

Corporate Secretary : Fajriyah Usman (T : +62 858-8330-8686, E : fajriyah.usman@pertamina.com)

This press release may contain forward-looking information based on current information and expectations of the Company that involve a number of risk, uncertainties, and assumptions. Among the factors that could cause the actual results to differ materially are industry conditions, prices of crude oil and gas, the Company's ability to obtain and the timing of new project, and changes in competitive factor. Should one or more of these risk or uncertainties materialize, or should the underlying assumption prove incorrect, actual outcomes could vary materially from those indicated

PGN expects this domestic gas swap initiative to further strengthen collective efforts in stabilizing and enhancing the efficiency of domestic gas supply. This policy plays a vital role in supporting energy needs across various sectors, particularly industry, while reducing reliance on imported energy through optimal utilization of domestic natural gas resources.
